

Harmony Living

So right for the city

Welcome to Harmony Living

We have expressly designed this exclusive condominium with the lifestyles and preferences of upwardly mobile movers & shakers in mind. The plumb central location is highly desirable, project amenities are 5-star, and the homes themselves and common areas are spacious, attractive and supremely functional. Moreover, even with only 24 units – just four per floor – the price is still rather sensible. In other words, if you love all that Bangkok has to offer, place a high premium on your private time and personal serenity and also recognise an exceptional investment when you see one, an early viewing is highly recommended.

Plus Harmony Living, Paholyothin Soi 11, will give discerning city-dwellers another prime residential alternative. Again, an exclusive low-rise (8-storey) development comprising two buildings specially curved to optimise natural light and unobstructed views, watch out for this next deluxe condominium offering from our company coming soon!

Ideal homes

The hunt for a thoughtfully designed city-centre freehold condominium with room to really stretch out and every luxury on the doorstep is over.

With its great location, low population, and larger than life units, Harmony Living is the perfect uptown residence package.

On line to everything

Discretely located inside Sukhumvit Soi 15, Harmony living is within easy reach of the underground and skytrain stations at Sukhumvit and Asoke.

It is also within a stone's throw of the NIST International School, Bumrungrad Hospital, top shops and all the myriad attractions Sukhumvit's prime residential and entertainment location has to offer.

Equal opportunity elitism

Harmony living has been specially designed with all units roughly the same size – on average 120 sq.m. – and each with two large bedrooms plus maid's quarters. The only exception is a 229 sq.m. duplex. Thus the likelihood of disturbance from neighbours who are not like-minded is minimal. In fact, you'll probably make several fast friends.

Pristine peace is also preserved by the fact that there are just four units on each floor – and only eight floors altogether, making a total of a mere 24 truly exclusive homes.

Up-coming project in Paholyothin Soi 11.

Designed for deluxe living

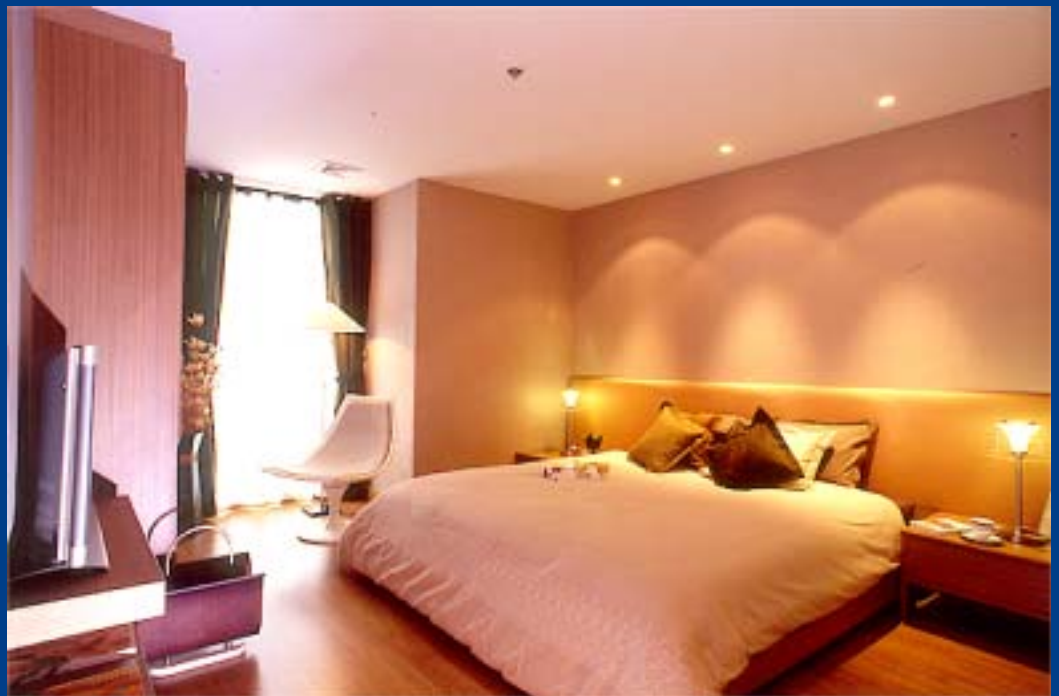

Around 120 sq. m. is a perfect size for a full two-bedroom condominium.

It allows for two generously proportioned bedrooms with plenty of room for fully-fitted wardrobes and a king size bed. Each bedroom also has a large ensuite bathroom big enough for a tub as well as separate shower and toilet cubicles. Another nice optional feature is glass panelling between bathroom and bedroom, creating a modern, interactive space to inhabit. The master bedroom also boasts a beautiful balcony with sliding French windows, completing the picture of light-infused luxury.

There is also plenty of space for a large studio-size living and dining area, also with a balcony accessed by floor-to-ceiling doors.

And tucked inside to the right or left of the front door, depending on unit, is an equally practically proportioned kitchen, laundry and maid area with separated bedroom and bathroom. Plus a guest toilet – in itself an unusual feature even in other high quality two-bedroom condominiums in Bangkok.

The clever design ensures that every inch of space is optimised. What's more, the interesting configuration of sleeping, living, and cooking and service modules, with nice wide corridors leading the way, firmly enhances the personal pleasure of being at home.

Full-on facilities

At Harmony Living, it's easy to work your work-out into your schedule, no matter how tight. On-hand is a fine fitness centre equipped with a comprehensive range of carefully chosen, high-end machines. On the roof, meanwhile, is a large, landscaped swimming pool with separate children's pool, all set amid lush green foliage and surrounded by shady umbrellas and inviting loungers.

Cutting-edge configuration

Wi-fi internet infrastructure in each unit gives open around-the-clock access to the information highway. Most common areas are similarly equipped.

Safer than houses

Residents of Harmony Living will enjoy real peace of mind thanks to first-rate fire and security equipment and services. Key card access to the building further ensures that there are no unwanted intruders.

Priority parking

It's more expensive to create an underground car park than to put it overground but the developers of Harmony Living believe that it is absolutely necessary in order to preserve the condominium's people-friendly ambience and gorgeous aesthetics.

Get while the going's good

Enjoy some of the most competitive square metre prices for a deluxe freehold condominium that you are never likely to find again, starting at just 63,000 baht.
